This year’s Summer Program features classes specifically for grades 4 through 8. The classes begin at 9:00 a.m. and end at noon unless otherwise specified. Should you need care before or after this time, please complete the Elementary Registration form to specify blocks of time desired. Students will join others in Elementary outside of Feature Class times. Please note that classes have limits to the number of participants and are charged at a weekly rate. For consistency, participants should be able to attend all five days of class within any given week. Program times subject to change. Schedule will be given as program dates near. Unless otherwise specified, Space is limited to 25 students per day. Registration will be filled on a first come, first served basis.

Please Indicate Your Choices by placing a “√” in coordinating

Overall Theme: Incredible Information of Intrigue and Imagination

June 3rd – 7th – Summer Kickoff
School’s out for summer! Let’s start the summer with a great time and no homework! This week will have many activities that will start the summer with a blast. From art projects to games, there will be a whole lot of fun and comradery to be had during MSOW’s summer kickoff week!

June 10th – 14th – Arts & Entertainment
What makes this world beautiful and fun? Well, arts and entertainment are 2 ingredients that definitely put a certain flair and flavor into our lives. Activities will include art projects, jewelry making, music, improv./drama, sculpture making and a great time! Come and be the entertainment while we experience the arts.

June 17th – 21st – Trees & Plants of MSOW’S Campus
MSOW has lost many of its trees! Fear not, it is all necessary for the new construction. We will put some of the trees that were cut down on the MSOW property to use to make both pieces of Art and works for History and Botany lessons in the form of tree cookies. Learn how to ID a tree, sand and finish simple wood work, and make new materials for MSOW classrooms. There will also be an opportunity to learn about ourselves in the form of a family tree!

June 24th – 28th – Around the World in 5 days – A Culinary Journey of Culture
Spend a week learning about five different cultures from around the world, their food, their music, what games they play and much more. No passport or luggage required!

July 8th – 12th – Midsummer Fun!
Come be a part of the most spectacular week of the summer! Activities will include numerous field trips, games, delicious food, art projects & a pinewood derby race to end the week! There will be no shortage of fun and adventure during this week! Come and be a part of an amazing time! (Please note: This is a 9am-3pm theme week and space is limited to 16 students due to transportation limitations for off-site activities from MSOW campus.)

July 15th – 19th – Games Galore!
Let’s play a game. Actually we will be playing a lot of them! Games will include: pencil & paper games, dice games, card games, board games, word games, gymnasium games, turn based games, and many other types of games that can be experienced. This will be a fun-filled week and will bring out the spirit of competition and sportsmanship in the kids!

July 22nd – 26th – Medical Devices & Our Bodies
What is the difference between a pacemaker and a defibrillator? What is an artificial knee or hip made of and why? What materials do dentists use to fix your teeth? We will research all of these questions and more. Come and see how some of the advancements in technology have helped with making our bodies healthy and continue to work!

July 29th – August 2 – Fantastic Feathered Friends
We already have the MSOW chicken flock. Let’s try to establish a home for Purple Martins at MSOW by building and erecting a home for them. Along the way, we will research other local feathered friends and make sure they find a happy home near our school, too. Birds are amazing creatures, let’s learn about them!

August 5th – 9th – Composting – Natures Recycling
Let’s learn about what we can and cannot compost, and how our MSOW chickens can help, while designing a school wide composting plan for our future raised bed gardens. Composting will not be the only topic, as many aspects of recycling will also be covered. Let’s work together and take some important steps to preserve our planet!

August 12th – 16th – End of Summer Extravaganza
Let’s kick-start our brains and get them ready for the next school year. Activities will include plenty of games, jigsaw puzzles, word searches, crossword puzzles, trivia, quizzes, and the famous MSOW escape room to end the week! This is going to be a fun week to end the summer, and get our minds ready to learn for the fall!
Upper Elementary Summer Programs 2 - Off Site – Mr. Bednarek

June 10th – 14th - Hike the Ice Age Trail (IAT) Waukesha County Northern Half
This class will be for those students who want an adventure. The Wisconsin IAT follows the terminal moraine, or furthest extent of the glaciers from the last ice age. The entire trail covers over 1,000 miles through 30 counties. This class will be the first of two related classes, the second one to be held July 22-26. Note: It is not required that a student attends both sessions. The plan is to use maps, trail markers, compasses, and GPS receivers to hike the northern portion of the trail over the course of five days, rain or shine. We will cover hiking safety, handling emergencies, and basic navigation. Each morning, we will be dropped off at the beginning of a trail section, then make our way to the pick up point, taking time to explore several of the various features along the way, geocaching, and resting when needed. Learning about glacial topography will be included. The next day we will start where we left off and get as far as we can, with the goal of covering about half of the 45.8 miles of IAT in the county (from the north county line in Monches to Lapham Peak). Due to the extent of this program, two or three afternoons will also be needed to allow time for ample breaks and exploration.

Due to the physical nature of this class, participating students should be able to walk moderate distances. For an additional $6 fee, interested students may also participate in the Ice Age Trail Alliance program called Walk the Wauk. In this program, hikers who complete all the segments of the IAT in Waukesha County will receive a completion certificate and IAT patch for their accomplishment. Please contact Mr. Bednarek for more information. As a note, Mr. Bednarek is a former EMT and holds Wilderness First Aid, CPR, and AED certifications.

Limit - 12 students (Entering grades 4-8. If entering 4th grade, please contact Mr. Bednarek for additional information.)

June 24th – 28th - Advanced Hide and Seek
Geocaching is modern ‘treasure’ hunting. It requires students to use GPS receivers to locate hidden objects in a variety of urban and rural environments. Approximately 1000 geocaches are hidden within a 10-mile radius of Waukesha. Some caches are easy to find, while others take hours to find all stages. Caches can be anything from small fake rocks to large plastic storage containers. Each is usually hidden with a logbook inside, and many have small tradable items. The students will decide which caches to try and find, balancing difficulty with the desire to find many during the week. We will also launch at least one Travel Bug during the week, plus hide our own cache for others to find.

This class will mostly take place outside in all but stormy weather. Students will need to carry water and snacks, and possibly rain gear. Longer hikes could be a part of this week, but no special hiking skills should be needed.

Limit – 7 students (Entering grades 4-8)

July 22nd – 26th - Hike the Ice Age Trail (IAT) - Waukesha County - Southern Half
This class will be for those students who want an adventure. The Wisconsin IAT follows the terminal moraine, or furthest extent of the glaciers from the last ice age. The entire trail covers over 1,000 miles through 30 counties. This class will be the second of the two Waukesha County IAT classes. Attending the first class is not required to attend this week. The plan is to use maps, trail markers, compasses, and GPS receivers to hike the southern portion of the trail over the course of five days, rain or shine. We will cover hiking safety, handling emergencies, and basic navigation.

Each morning, we will be dropped off at the beginning of a trail section, then make our way to the pick up point, taking time to explore several of the various features along the way, geocaching, and resting when needed. Learning about glacial topography will be included. The next day we will start where we left off and get as far as we can, with the goal of covering about half of the 45.8 miles of IAT in the county (from Lapham Peak to the county line west of Eagle). Due to the extent of this program, two or three afternoons will also be needed to allow for ample breaks and exploration. Due to the physical nature of this class, participating students should be able to walk moderate distances. For an additional $6 fee, interested students may also participate in the Ice Age Trail Alliance program called Walk the Wauk. In this program, hikers who complete all the segments of the IAT in Waukesha County will receive a completion certificate and IAT patch for their accomplishment. Please contact Mr. Bednarek for more information. As a note, Mr. Bednarek is a former EMT and holds Wilderness First Aid, CPR, and AED certifications.

Limit - 12 students (Entering grades 4-8. If entering 4th grade, please contact Mr. Bednarek for additional information.)
July 29th – August 2nd - Location Photography
During this class, students will travel to various locations and experiment with different photographic techniques. This class will be for students who have at least a little familiarity with their regular or smartphone camera and want to expand their skills. We will concentrate on composition and camera settings to make the best of each photograph.

Potential locations and types of photography include the following:
• Milwaukee County Zoo for animal photography
• Prairies and parks for nature and landscape photography
• Downtown Waukesha for urban and architectural photography
• Other locations as determined by student interest

Students will also get to work with portrait photography, forced perspective photography, and possibly action photography during the week if time permits. Please note that the class will extend into the afternoon on the day we go to the zoo.

It would be ideal if your child would be able to provide a digital camera, however I will have one or two cameras for kids to share if that is not an option.

Limit - 7 students (Entering grades 4-8)

August 5th – 9th - Bike Week – August 5-9
This class is for those who want to spend a week on two wheels. Though the schedule for this class might vary due to weather, the goal is to work on bike handling and safety skills, cover basic maintenance, and then ride and play as much as possible.

Due to construction on our campus, the class will be based at Lapham Peak State Park in Delafield (13 minutes from MSOW). That location will allow us paved access to the Glacial Drumlin Trail and the Lake Country Recreation Trail. It will also allow us to use the mountain bike trails in the prairie so the students become more comfortable riding on uneven surfaces. The trails there are fairly basic with no real technical areas. The park also has restrooms, space to work on skills, and shelters to use in inclement weather. Participants will receive a fee waiver to use for park and trail access.

During the week, the students will ride on trails to LeDuc’s for a custard stop, explore Cushing Park in Delafield, and generally have fun on the trail systems in that area of the county.

Since we will ride on both paved and grassy areas, students should have a bike in good working order, ideally with at least one shock and at least somewhat knobby tires. Hybrid or basic mountain bikes tend to work well. Helmets will be required.

Meeting at Lapham Peak will require participants to be dropped off and picked up there. Families can carpool or coordinate with others for transportation once we have a class roster. Mr. Bednarek will be able to transport two or three bikes if needed as well. If your child will be in aftercare, we can work to coordinate transportation back to MSOW.

Once we get closer to the week of the class, an email will be sent to participants with further information. As a note, besides being an avid cyclist, Mr. Bednarek is a former EMT and holds Wilderness First Aid, CPR, and AED certifications.

Limit 10 students (Entering grades 5-8 or entering grade 4 if already fairly confident with themselves and their bike.)

The undersigned is hereby obligated to pay all fees associated with the indicated choices for enrollment in this contract regardless of a later decision not to attend Montessori School of Waukesha during the contract period in question (applicable “drop” deadlines are listed above). All fees will be invoiced monthly and are due by the first of the month in which services will be rendered. A copy of this contract and your first month’s invoice will serve as your confirmation.

__________________________________________
Signature of Responsible Party          Date

A $5.00 service fee will be charged for days that are swapped after the drop deadline dates. In addition, a 15% upcharge will be applied to care used with less than five business days advance notice.
